

KRIWAN Pump Protection

KRIWAN PUMP PROTECTION

Product overview

KRIWAN pump protection devices offer a reliable and user-friendly solution for the protection and monitoring of pumps and pump systems for a wide range of applications.

		INT69® YF Diagnose EXTENDED	INT69® YF Diagnose STANDARD	INT69® F Diagnose BASIC
Motor temperature	PTC, PT100, PT1000, bimetal	●	●	●
Temperature 1	PTC, PT100, PT1000	●	●	
Temperature 2	PTC, PT100, PT1000	●	●	
Leakage 1	Conductivity, float switch	●	●	● only conductivity
Leakage 2	Conductivity, float switch	●	●	
Analog input	4–20 mA	●		
Phase monitoring	Phase sequence, phase failure, phase asymmetry, overvoltage, undervoltage	●	●	
Relay alarm		●	●	●
Relay warning		●		

KRIWAN PUMP PROTECTION

Protect the pump and collect data at the same time

Your benefits

- Maximum operational safety through protection and warning relays
- Space and cost savings – replaces up to 7 individual devices
- Fast troubleshooting and documentation through Diagnostic and INTspecter App
- Flexibility through individual parameterization
- Connectable up to the cloud
- Quick and easy wiring through push-in terminals
- Control cabinet mounting on 35 mm standard rail
- Tamper-proof

KRIWAN CONNECTED 4.0

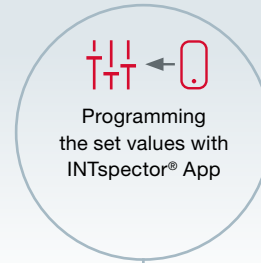

The intelligent KRIWAN Diagnose system is easy to implement, flexible scalable, and makes reliable and efficient system operation possible with Condition Monitoring.

KRIWAN Diagnose devices save machine and system data which can be viewed on-site with the **INTspector® App** or remotely with integration into a system controller.

INTspector® App

- Parameterization
- Diagnosis
- Access to device data and information
- Detailed history of error events
- Sensor data and development before and after the error occurred
- Error counter for all device errors
- PDF report

Programming
the set values with
INTspector® App

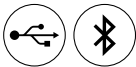

Direct diagnosis
with INTspector® App,
access to device
data

INT69® Diagnose

Protection ⊕ Monitoring

OR

Integration into the system controller

Integration into the system controller

- Converting of KRIWAN Diagnose device data into Modbus protocol with INT®600 DM Gateway
- Continuous, long-term monitoring
- Connectable up to the cloud

INTspecter® App

Connectivity

INT®600 DM Gateway

System Controller
