

# INT10® Anemometer

INT10

Dimensions in mm

## Application

KRIWAN anemometers are used in challenging wind speed measurement applications, e.g.

- For monitoring cranes, ski lifts and cable cars
- For energy optimisation in wind farms
- For blinds protection in building technology
- In hydrology and meteorology
- As weather station components for building and greenhouse control

## Functional description

The KRIWAN anemometer measures the current wind speed and converts it into a linear output signal without contact. The sensor is storm-proof and weather-proof. The autonomously controlled heating enables use at temperatures as low as -40°C.

The evaluation is then conducted separately using a measuring device, a display instrument, or the connected control and monitoring system.

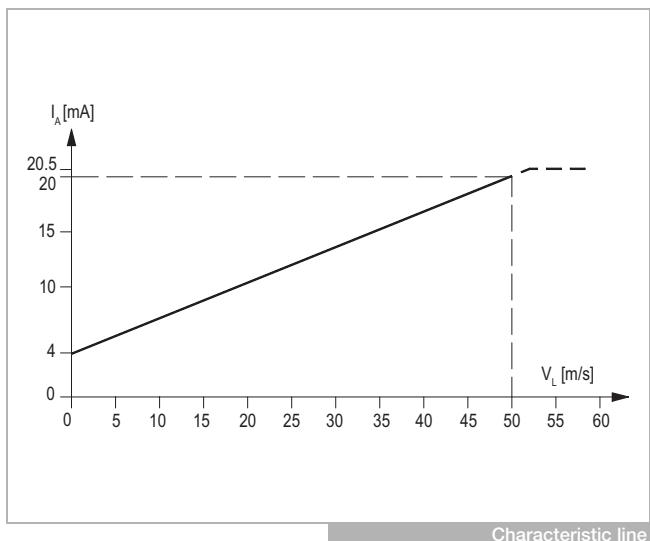

The following features characterise this KRIWAN anemometer:

- Sturdy and reliable industrial design
- Low starting torque, high strength
- High accuracy
- Wear-free measurement
- Optimised power requirement through electronically regulated heating
- Easy installation
- Extended temperature range
- Integrated overvoltage protection
- Impact and shake resistant
- cUL<sub>US</sub> - certified (if available or applied for)
- Maintenance-free

The unit must be connected by trained electrical personnel. All valid European and national standards for connecting electrical equipment must be observed. To avoid any consequential damage or operational failure, through direct or indirect excitation in the event of lightning strikes, we recommend that a separate lightning protection device be fitted by the customer.

## Technical specifications

Measuring principle	Contact-free magnetic scanning system
Measuring range	0-50m/s
Accuracy	$\pm 0.5\text{m/s}$
Resolution	<0.1m/s
Start-up speed	<0.4m/s ( $\theta_u=20^\circ\text{C}$ )
Supply	DC 24V $\pm 25\%$ Max. 30mA Reverse polarity protection
Signal output	DC 4-20mA Limited to 20.5mA
Signal availability	Max. 2.5s (from voltage-free state)
Load resistance = line + load resistor	$R_{\text{Load}} \leq 600\Omega$
Connection type	
- Sensor	7-pin plug (M16)
- Recommended connecting cable	7x0.5mm <sup>2</sup>
Permissible ambient temperature $T_A$	-40...+70°C When heating is not connected: Snow and ice-free sensor is prerequisite.
Permissible relative humidity	0-100% RH
Stability	For wind speed of 80m/s (max. 30min)
Heating	
- Type	Autonomously controlled heating
- Connection	AC/DC 24V $\pm 20\%$ Max. 20VA SELV
Protection class according to EN 60529	IP64 if sensor is assembled in the specified manner
Mounting	Central mounting M27
Dimensions	See dimensions in mm
Housing	
- Material	Aluminium
- Corrosion resistance	Anodised
Cup anemometer	
- Material	Aluminium
- Corrosion resistance	Powder-coated
Weight	Approx. 400 g
Check base	EN 61000-6-2, EN 61000-6-3, EN 61010-1
Approval	UL file no. E240032

## Order data

INT10 Anemometer	<b>13 N 219 S51</b>
Accessories and application information	see <a href="http://www.kriwan.com">www.kriwan.com</a>
<b>Spare parts</b>	
Spare parts package cup anemometer (cup anemometer, cap nut, serrated washer)	<b>02 Z 160</b>
Hexagon nut M27x1.5	<b>HM27002400</b>
Serrated washer J28	<b>HX28014600</b>
Self-locking cap nut M4	<b>HM04009400</b>
